ATTN: Mr. Ronnie Smith
NCDOT Coordinator

Dear Sir:

Subject: **Application for a Section 404 Nationwide Permit No. 23 and Section 10 Permit** for the proposed Bridge No. 188 on SR 1316 over the Cape Fear River and Bridge No. 189 over an unnamed tributary of the Cape Fear River in Bladen County. Federal Aid Project No. BRZ-1316(6), TIP No. B-4712, WBS Element 37912.1.1.

The North Carolina Department of Transportation (NCDOT) proposes to replace the 1,473-foot 24-span Bridge No. 188 with a 1,570-foot, 14-span bridge and the 280-foot eight-span Bridge No. 189 with a 300-foot four-span bridge; both on a new alignment while maintaining traffic on the existing structures during construction. Overhead powerline utilities will be relocated away from the bridges and telephone lines will be adjusted. No permanent impacts to jurisdictional resources are proposed.

Please see enclosed copies of the Pre-Construction Notification (PCN), permit drawings, stormwater management plan, and design plans for the above referenced project. The Categorical Exclusion (CE) was completed in September 2011. Copies were distributed shortly thereafter. Additional copies are available upon request.

This project calls for a letting date of February 19, 2013 and a review date of January 1, 2013. The project schedule may be advanced if funding becomes available.

Regulatory Approvals

Section 404 Permit: All aspects of this project are being processed by the Federal Highway Administration as a "Categorical Exclusion" in accordance with 23 CFR 771.115(b). The NCDOT requests that these activities be authorized by Nationwide Permit 23.

Section 401 Permit: We anticipate 401 General Certification number 3891 will apply to this project. All general conditions of the Water Quality Certification will be met and therefore NCDOT is not requesting written approval. NCDOT is providing two copies of this application to the NCDWQ for their review.

D. Impact Justification and Mitigation

1. Avoidance and Minimization

1a. Specifically describe measures taken to avoid or minimize the proposed impacts in designing project.

The proposed Bridge No. 188 is 97 feet longer than the existing bridge and the proposed Bridge No. 189 is 20 feet longer than the existing bridge; the proposed bridges will be at approximately the same grade as the existing structures; there will be no permanent fill or excavation in jurisdictional areas. Deck drains are limited to overbank area under bridge with no direct discharge into the river. Removal of existing road fill for longer bridge and increasing bridge opening will improve hydrological conveyance and wildlife passage, and reduce bridge opening velocities. Stream-side areas will be graded such that elevations match natural/undeveloped floodplain in project vicinity. Promotion of sheet flow and infiltration over grassed surfaces.

1b. Specifically describe measures taken to avoid or minimize the proposed impacts through construction techniques.

Construction will be both top-down and utilize temporary work pads and barges. There will be no permanent fill or excavation in jurisdictional areas. An in-water work moratorium for the protection of anadroumous fish in the Cape Fear River will be adhered to.

2. Compensatory Mitigation for Impacts to Waters of the U.S. or Waters of the State
