ATTN: Mr. Monte Matthews
NCDOT Coordinator

Subject: **Application for Section 404 Nationwide Permit 13 & 33** for the proposed replacement of Bridge No. 88 over Paul's Creek on SR 1621 (Sparger Road) in Surry County, Federal Aid Project No. BRZ-1621(4); Division 11; WBS No. 38591.1.1; TIP No. B-4821

Dear Sir:

The North Carolina Department of Transportation (NCDOT) proposes to replace Bridge No. 88 over Paul's Creek with a 152-foot long, triple-span bridge with a 33-inch wide cored slab structure. There will be 60 linear feet of bank stabilization on Paul's Creek at two locations. There will be < 0.01 acre of temporary impacts from the utilization of two temporary causeways.

NCDOT does not propose mitigation for stream bank stabilization along Paul's Creek. Stabilizing the bank of a stream does not require fill in the stream bed and, therefore, under Section 404 of the Clean Water Act, does not constitute Loss of Waters of the U.S. and is not subject to compensatory mitigation by the USACE.

Please see enclosed copies of the Pre-Construction Notification (PCN), Stormwater Management Plan, permit drawings, and design plans. A Programmatic Categorical Exclusion (PCE) was completed in September 2012 and distributed shortly thereafter. Additional copies are available upon request.

Comments from the North Carolina Wildlife Resources Commission (NCWRC) will be required prior to authorization by the Corps of Engineers. By copy of this letter and attachments, NCDOT hereby requests NCWRC review. NCDOT requests that NCWRC forward their comments to the Corps of Engineers and the NCDOT within 30 calendar days of receipt of this application.

D. Impact Justification and Mitigation

1. Avoidance and Minimization

1a. Specifically describe measures taken to avoid or minimize the proposed impacts in designing project.

The proposed bridge is 16 feet longer than the existing bridge; the existing bridge is a 3-span structure with two bents in the stream, while the new bridge will be a triple-span structure but will span the entire stream (no bents in the stream); there will be no deck drains on the proposed bridge; the proposed bridge will be at approximately the same grade as the existing structure; an off site detour will be used, 3:1 fill slopes will be utilizied where practicable.

1b. Specifically describe measures taken to avoid or minimize the proposed impacts through construction techniques.

Use of Best Management Practices (BMP) and measures used in the project are non-structural and are an attempt tp reduce the stormwater impacts to the receiving stream due to erosion and runoff as well as attenuate and disperse stormwater before entering the receiving waters. Two temporary causeways will be utilized to remove the two existing interior bents.

2. Compensatory Mitigation for Impacts to Waters of the U.S. or Waters of the State

2a. Does the project require Compensatory Mitigation for impacts to Waters of the U.S. or Waters of the State?	☐ Yes ☒ No If no, explain: The NCDOT does not propose mitigation for stream bank stabilization activities. Stabilizing the bank of a stream does not require fill in the stream bed and, therefore, under Section 404 of the Clean Water Act, does not constitute Loss of Waters of the U.S. and is not subject to compensatory mitigation. Furthermore, the proposed bank stabilization activities are necessary to prevent erosion and sedimentation, i.e. preventing bank destabilization, and minimizing impacts to the environment.
2b. If yes, mitigation is required by (check all that apply):	☐ DWQ ☐ Corps
2c. If yes, which mitigat ion option will be used for this project?	☐ Mitigation bank ☐ Payment to in-lieu fee program ☐ Permittee Responsible Mitigation

5. Complete if Using a Permittee Responsible Mitigation Plan

5a. If using a permittee responsible mitigation plan, provide a description of the proposed mitigation plan.

6. Buffer Mitigation (State Regulated Riparian Buffer Rules) – required by DWQ

6a. Will the project result in an impact within a protected riparian buffer that requires buffer mitigation?	☐ Yes ☐ No
