US Army Corps of Engineers
Raleigh Field Office
6508 Falls of Neuse Road, Suite120
Raleigh, NC 27615-6814

ATTENTION: John Thomas
NCDOT Coordinator, Division 11

Dear Sir:

Subject: **Application for Individual Section 404 and Section 401 Water Quality Certification** for the widening of NC 67 from SR 1355 (Messick Road) to US 601 in Booneville, Yadkin County. State Project No. 6.771008. Division 11, T.I.P. No. R-3415: $475.00 Debit Work Order 6.771008, WBS Element 34541.1.1.

The North Carolina Department of Transportation (NCDOT) proposes to improve NC 67 from SR 1355 to US 601 in Booneville by widening and constructing turn lanes. NC 67 will vary from two lanes to three lanes, on existing location, and 24 feet to 36 feet travel way, including 2 foot paved shoulders. Curb and gutter may be added in some spots along NC 67. The project length is approximately 6.2 miles. This application package consists of the cover letter, ENG4345 form, permit drawings, Natural Resource Technical Report, Minimum Criteria Checklist, EEP acceptance letter and half size roadway plan sheets.

Purpose and Need: To improve traffic operations, level of service, and safety along the proposed section of NC 67.

Summary of Impacts: The project lies in the Yadkin-Pee Dee Basin (Hydrologic Categorical Unit 03040101). Permanent impacts resulting from the construction of this project are 1198 linear feet of streams. No wetlands will be impacted by the construction of this project.

Summary of Mitigation: Throughout the design process this project has been designed to avoid and minimize impacts to jurisdictional areas. The project will be conducted on existing roadway and will thereby minimize natural resource impacts. Specific strategies are detailed

elsewhere in this document. The necessary compensatory mitigation for unavoidable impacts to 1,198 linear feet of streams will be provided by the EEP.

PROJECT SCHEDULE

This project is scheduled to let June 21, 2005 with a review date of May 3, 2005 and a date of availability of July 26, 2005.

ENVIRONMENTAL DOCUMENT STATUS

This project is state funded and a Minimum Criteria Determination Checklist was signed.

IMPACTS TO WATERS OF THE UNITED STATES

Construction of the proposed project will necessitate impacts to jurisdictional perennial streams. The project lies in the Yadkin-Pee Dee Basin (Hydrologic Categorical Unit 03040101). All impacted streams are classified as Class C. Impacts resulting from the construction of this project are 1198 linear feet of streams. No streams within the project or within 1.0 mile of the project are found on the 303(d) list of impaired waters.

Site 1 will involve extending the triple box culvert over Lineberry Creek. Also, Site 1 will involve the filling of a UT to Lineberry Creek and relocating the stream into a grass lined lateral base ditch with the placement of two crossvanes to control water velocity.

Site 2 will involve the extension of the triple box culvert over Williams Creek.

Site 3 will involve the extension of a double box culvert over Williams Creek. Also, at the inlet of the culvert, Williams Creek and a UT to Williams Creek will be filled and relocated. Part of the UT to Williams Creek will be relocated in a grassed lined lateral base ditch. Part of Williams Creek will be relocated into a grassed lined lateral base ditch with the placement of one cross vane.

Site 4 will involve the extension of a single box culvert with a reinforced concrete pipe to a UT to Williams Creek.

Site 5 will involve the extension of a single box culvert on a UT to Williams Creek.

Site 6 will involve the filling and relocating of a UT to North Deep Creek into a lateral base ditch lined with Permanent Soil Reinforcement Matting.

Site 7 will involve the extension of a single box culvert with a reinforced concrete pipe on a UT to North Deep Creek.

Site 8 will involve the extension of a single box culvert with a reinforced concrete pipe on a UT to North Deep Creek.

Site 9 will involve the extension of a single box culvert with a reinforced concrete pipe on a UT to North Deep Creek.

Site 10 will involve the extension of a single box culvert with a reinforced concrete pipe on a UT to North Deep Creek.

Site No.	Stream	Best Usage Classification	Index Number	Linear Impact (ft)
1	Lineberry Creek	C	12-60	32
1	UT to Lineberry Creek	C	12-60	325
2	Williams Creek	C	12-61	28
3	Williams Creek	C	12-61	240
3	UT to Williams Creek	C	12-61	74
4	UT to Williams Creek	C	12-61	60

7	UT to North Deep Creek	C	12-84-1-(0.5)	48
8	UT to North Deep Creek	C	12-84-1-(0.5)	49
9	UT to North Deep Creek	C	12-84-1-(0.5)	98
10	UT to North Deep Creek	C	12-84-1-(0.5)	80
Total				**1198**

MITIGATION OPTIONS

The US Army Corps of Engineers (USACE) has adopted, through the Council on Environmental Quality (CEQ), a wetland mitigation policy that embraces the concept of "no net loss of wetlands" and sequencing. The purpose of this policy is to restore and maintain the chemical, biological, and physical integrity of the waters of the United States. CEQ has defined mitigation of wetland and surface-water impacts to include: avoiding impacts, minimizing impacts, rectifying impacts, reducing impacts over time, and compensating for impacts (40 CFR 1508.20). For this project, mitigation is only required for impacts associated with jurisdictional streams. No jurisdictional wetlands will be impacted by this project.

The NCDOT is committed to incorporating all reasonable and practicable design features to avoid and minimize jurisdictional impacts, and to provide full compensatory mitigation of all remaining, unavoidable jurisdictional impacts. Avoidance measures were taken during the planning and minimization measures were incorporated as part of the project design. Minimization includes the examination of appropriate and practicable steps to reduce the adverse impacts.

Avoidance: Impacts to jurisdictional streams could not be avoided.

Minimization: The following techniques were implemented:

- The project is a widening of an existing road instead of new location.

- Streams at Sites 1, 3 and 6 will be relocated by lateral base ditches instead of pipes. The short channels were meandered and the use of rock cross vanes are designed to stabilize the new channels.

- Used Permanent Soil Reinforcement Matting in lieu of rip rap in ditches, where practical.

- Stormwater will be treated by lateral base ditches near Sites 1, 2, 4, 5, 8, 9, and 10.

- The shoulder width was minimized throughout the project.

- Sills are used in multi-barrel box culverts to maintain low flow velocities and depths.

- Slopes of 2:1 were used in the vicinity of the streams.

- Preformed Scour Hole is located at Station No. 140+00.

- NCDOT's Best Management Practices for the Protection of Surface Waters will be enforced.

Compensation The primary emphasis of the compensatory mitigation is to reestablish a condition that would have existed if the project were not built. As previously stated, mitigation is limited to reasonable expenditures and practicable considerations related to highway operation. Mitigation is generally accomplished through a combination of methods designed to replace wetland functions and values lost as a result of construction of the project. These methods consist of creation of new wetlands from uplands, borrow pits, and other non-wetland areas; restoration of wetlands; and enhancement of existing wetlands. Where such options may not be available, or when existing wetlands and wetland-surface water complexes are considered to be important resources worthy of preservation, consideration is given to preservation as at least one component of a compensatory mitigation proposal.

Based upon the agreements stipulated in the "Memorandum of Agreement Among the North Carolina Department of Environment and Natural Resources, the North Carolina Department of Transportation, and the U.S. Army Corps of Engineers, Wilmington District" (MOA), it is understood that the North Carolina Department of Environment and Natural Resources EEP, will assume responsibility for satisfying the federal Clean Water Act compensatory mitigation requirements for NCDOT projects that are listed in Exhibit 2 of the subject MOA during the EEP transition period which ends on June 30, 2005.

Although the subject project is not listed in Exhibit 2, or included on a supplemental project list submitted to EEP, EEP will provide the necessary compensatory mitigation to offset unavoidable impacts to waters that are jurisdictional under the federal Clean Water Act. The offsetting mitigation will derive from an inventory of assets already in existence within the same 8-digit cataloguing unit. The Department has avoided and minimized impacts to jurisdictional resources to the greatest extent possible as described above. The remaining, unavoidable impacts to 1198 linear feet of jurisdictional streams Yadkin Pee-Dee River Basin HU 03040101 will be

offset by compensatory mitigation provided by the EEP program. Enclosed in this application is the EEP acceptance letter.

UTILITIES

Utility relocations will not be conducted in jurisdictional areas.

FEDERALLY-PROTECTED SPECIES

Plants and animals with federal classifications of Endangered, Threatened, Proposed Endangered, and Proposed Threatened are protected under provisions of Section 7 and Section 9 of the Endangered Species Act of 1973, as amended. As of January 29, 2003, the United States Fish and Wildlife Service (USFWS) lists no federally protected species for Yadkin County.

CULTURAL RESOURCES

This project will not have any effect on property listed on the National Register of Historic Places and will not require acquisition of additional right-of-way from publicly owned parkland or recreational areas.

FEMA COMPLIANCE

The project has been coordinated with appropriate state and local officials and the Federal Emergency Management Agency (FEMA) to assure compliance with FEMA, state, and local floodway regulations.

WILD AND SCENIC RIVER SYTEM

The project will not impact waters designated within the Wild and Scenic Rivers System or any rivers included in the list of study rivers (Public Law 90-542, as amended).

REGULATORY APPROVALS

Application is hereby made for a Department of the Army Individual Section 404 Permit as required for the above-described activities. We are also hereby requesting a Section 401 Water Quality Certification from the Division of Water Quality. In compliance with Section 143-215.3D(e) of the NCAC, $475.00 from NCDOT debit account will provide payment for processing the Section 401 permit application. We are providing seven copies of this application to the North Carolina Department of Environment and Natural Resources, Division of Water Quality, for their review.

If you have any questions or need additional information, please call Rachelle Beauregard at 715-1383.

Sincerely,

Gregory J. Thorpe, Ph.D.

MINIMUM CRITERIA DETERMINATION CHECKLIST

TIP Project No. R-3415
State Project No. **6.771008**

Project Location: NC 67 from SR 1355 (Messick Road) to US 601 in Booneville located in Yadkin County.

Project Description: The proposed project calls for minimal improvements to NC 67 from SR 1355 (Messick Road) to US 601 in Booneville. Improvements to the project include widening NC 67 and constructing turn lanes.

Purpose and Need: To improve traffic operations, level of service, and safety along the proposed section of NC 67.

Anticipated Permits or Consultation Requirements:

A Section 404 permit is required in accordance with the Clean Water Act 33 U.S.C 1344) from the U.S. Army Corps of Engineers, as well as a 401 permit from DWQ. A Nationwide permit No. 14 will also be required for all impacts to Waters of the United States impacted by this project.

Special Project Information:

Environmental Commitments:	Minimize impacts to the water resources in the project area.
Design Information:	Widen NC 67 and construct turn lanes within 80 feet (24.4 meters) of right of way, extending 6.2 miles (10 km).
Estimated Costs:	R/W: $1,000,000 Const: $ 2,500,000
Estimated Traffic:	2000 (ADT): 7,000 to 8,600 2025 (ADT): 13,000 to 15,800
Existing Cross Section:	Two-lane section, with 20' pavement width and varying shoulder.
Proposed Typical Roadway Section:	NC 67 will vary from two lanes to three lanes, on existing location, and 24 feet (7.2 m) to 36 feet (11 m) travel way, including 2ft (.6 m) paved shoulders. Curb and gutter may be added in some spots along NC 67.

Design Speed: 50 mph.

Functional Classification: Major Rural Collector

PART A: MINIMUM CRITERIA

		YES	NO
1.	Is the proposed project listed as a type which would qualify as a Non-Major Action under the Minimum Criteria?	X	

PART B: MINIMUM CRITERIA EXCEPTIONS

		YES	NO
2.	Is the proposed project likely to precipitate significant, foreseeable alterations in land use, planned growth, or development patterns?		X
3.	Does the proposed action divide or disrupt an established community?		X
4.	Does the proposed action bypass an existing community?		X
5.	Does the proposed action provide new access to areas containing significant amounts of exploitable natural resources?		X
6.	Is the proposed action likely to have a significant detrimental impact on air quality?		X
7.	Is the proposed action likely to have a significant detrimental impact on ambient noise levels for adjoining areas?		X
8.	Is the proposed action likely to have a significant impact on travel patterns or traffic volumes?		X
9.	Is the proposed action likely to significantly affect water quality?		X
10.	Does the proposed action require the relocation of significant numbers of people?		X
11.	Is the project likely to be controversial?		X
12.	Will the proposed action require the use of land owned by the U. S. Forest Service or the National Park Service?		X

PART C: COMPLIANCE WITH STATE AND FEDERAL REGULATIONS

	YES	NO
Ecological Impacts		
13. Is a federally protected threatened or endangered species, or its habitat, likely to be impacted by the proposed action?		X
	YES	NO
14. Does the action require the placement of fill in "Waters of the United States"?		X
15. Does the project require the placement of a significant amount of fill in high quality or relatively rare wetland ecosystems, such as mountain bogs or pine savannas?		X
16. Does the project require stream relocation or channel changes?	X	
17. Is the proposed action located in an Area of Environmental Concern, as defined in the Coastal Area Management Act?		X
Cultural Resources		
18. Will the project have an "effect" on a property or site listed on the National Register of Historic Places?		X
19. Will the proposed action require acquisition of additional right of way from publicly owned parkland or recreational areas?		X

Memorandum To: Cindy Sharer, P.E., Unit Head
Project Planning Unit

From: Matt Haney, Environmental Biologist
Natural Systems Unit

Subject: Natural Resources Investigation for proposed minimal improvements to NC 67 from SR 1355 (Messick Road) to US 601 in Booneville, Yadkin County, State Project No. 6.771008, TIP Project R-3415.

Attention: Stephanie Ledbetter, Project Planning Engineer
Project Planning Unit

The attached report addresses four issues pertinent to the development of a Minimum Threshold Determination Checklist for the proposed project: water resources, biotic resources, wetlands, and federally-protected species. The proposed project calls for minimal improvements to NC 67 from SR 1355 (Messick Road) to US 601 in Booneville in Yadkin County (see attached vicinity map). Improvements to the project include widening NC 67 and constructing turn lanes. The pavement will be widened to accommodate a 7.2 m (24 ft) travel way and 0.6 m (2 ft) paved shoulders. The proposed right-of-way is 24.4 m (80 ft). The project length is 10 km (6.2 mi).

NCDOT biologists Matt Haney, Jared Gray, and Jeff Burleson conducted a field investigation on May 31, 2001 to assess natural resources at the project site. Biotic communities were investigated and faunal composition was predicted based on habitats observed. In addition to field investigation, information concerning federally-protected species was obtained from the U.S. Fish and Wildlife Service (FWS) protected species list and the North Carolina Natural Heritage Program (NHP) database of rare species and unique habitats.

TERMINOLOGY AND DEFINITIONS

For the purposes of this document, the following terms are used concerning the limits of natural resources investigated. **Project study area** (project area) denotes the area bounded by the proposed right-of-way limits. **Project vicinity** describes an area extending 0.8 km (0.5 mi) on all sides of the project study area. **Project region** is

equivalent to an area represented by a 7.5 minute USGS quadrangle map [163.3 km^2 (61.8 mi^2)], with the project as the center point.

WATER RESOURCES

Water resource information encompasses physical aspects of the resource, its relationship to major water systems, Best Usage Standards, and water quality of the resources. Probable impacts to these water bodies are also discussed, as are means to minimize impacts.

Streams are assigned a best usage classification by the Division of Water Quality (DWQ, formerly known as the Department of Environmental Management). Four streams lie in the project study area (Table 1).

Table 1. Water Resources located in the project study area.

Stream Name	DEM Index No.	DEM Class	Date	River Basin
Lineberry Creek	12-60	C	4/6/55	Yadkin-Pee Dee
Williams Creek	12-61	C	4/6/55	Yadkin-Pee Dee
Ut* North Deep Creek	12-84-1-(0.5)	C	9/1/74	Yadkin-Pee Dee
Ut Williams Creek	12-61	C	4/6/55	Yadkin-Pee Dee

*Unnamed tributary

Class C waters are protected for secondary recreation, fishing, wildlife, fish and aquatic life propagation and survival, agriculture and other uses suitable for Class C. Secondary recreation includes wading, boating, and other uses involving human body contact with water where such activities take place in an infrequent, unorganized, or incidental manner. There are no restrictions on watershed development activities.

The Benthic Macroinvertebrate Ambient Network (BMAN) is managed by DWQ and is part of an ongoing ambient water quality monitoring program which addresses long term trends in water quality. The program assesses water quality by sampling for selected benthic macroinvertebrate organisms at fixed monitoring sites. Some macroinvertebrates are sensitive to very subtle changes in water quality; thus, the species richness and overall biomass of these organisms are reflections of water quality. North Deep Creek and Yadkin River received good-fair bioclassifications.

Point source dischargers located throughout North Carolina are permitted through the National Pollutant Discharge Elimination System (NPDES) program. Any discharger is required to register for a permit. There are four NPDES permitted dischargers in the project vicinity (Table 2).

Table 2. NPDES sites in the project vicinity.

Boonville WWTP	Ut Tanyard Creek	NC0020931	Yadkin	8/16/93	03-07-02

Aquatic communities are sensitive to minor changes in the environment. Any action that affects water quality can have an adverse impact on aquatic organisms. Although most of the disturbance caused by project construction will be temporary, some environmental impacts caused by the proposed project will be long-term or irreversible. Installation or modification of in-stream structures, such as replacement or extension of culverts, can permanently affect many physical stream parameters.

The following impacts to surface waters may result from project construction:

- Increased silt loading and sedimentation from erosion of disturbed soils.
- Changes in light incidence, water clarity, and water temperature due to increased sediment load and riparian vegetation removal.
- Alteration of stream discharge due to silt loading and changes in surface or groundwater drainage patterns.
- Increased potential for release of toxic compounds such as fuel and oil from construction equipment and other vehicles.

Precautions must be taken to minimize these and other impacts to water resources in the study area. NCDOT's Best Management Practices (BMP) for the Protection of Surface Waters must be strictly enforced throughout the construction stage of the project. Provisions to preclude contamination by toxic substances should also be strictly enforced.

BIOTIC RESOURCES

Terrestrial Communities

Three community types are present at the project study area. The communities consist of roadside maintained/disturbed, mixed hardwood forest, and riparian fringe. Dominant flora and fauna observed, or likely to occur in each community are provided below. Scientific nomenclature and common names (when applicable) are provided for each plant and animal species mentioned. Subsequent references to the same species will include the common name only. Animal species observed during the field visit are denoted with an asterisk.

Much of the wildlife in the project area likely use various communities for forage, cover, and nesting habitat. Many species are highly adaptive and may utilize the edges of forests and clearings. In addition, many species utilize both aquatic and terrestrial habitats, such that both are required for survival and reproduction. Birds observed in the project study area include indigo bunting* (*Passerina cyanea*), eastern phoebe* (*Sayornis*

phoebe), wood thrush* (*Hylocichla mustelina*), mockingbird* (*Mimus polyglottos*), yellow-breasted chat* (*Icteria virens*), and rufous-sided towhee* (*Pipilo erythrophthalmus*). Mammalian species likely to frequent disturbed habitats include eastern cottontail (*Sylvagus floridanus*), least shrew (*Cryptotis parva*), eastern harvest mouse (*Reithrodontomys humulis*), and hispid cotton rat (*Sigmodon hispidus*). Mammals commonly occurring in forested habitats include northern short-tailed shrew (*Blarina brevicauda*), gray squirrel (*Sciurus carolinensis*), and white-footed mouse (*Peromyscus leucopus*). Virginia opossum* (*Didelphis virginiana*) prefers wooded bottomlands near streams, ponds, swamps, and other sources of water. Eastern fence lizard (*Sceloporus undulatus*) and five-lined skink (*Eumeces fasciatus*) inhabit open habitats with plenty of sunlight. The slimy salamander (*Plethodon glutinosus*), spring peeper (*Hyla crucifer*), and eastern box turtle (*Terrapene carolina*) inhabit woodlands. Fish species that could inhabit streams in the project area include: yellow bullhead (*Ameiurus natalis*), brown bullhead (*A. nebulosus*), channel catfish (*Ictalurus punctatus*), redbreast sunfish (*Lepomis auritus*), bluegill (*L. macrochirus*), largemouth bass (*Micropterus salmoides*), white crappie (*Pomoxis annularis*), and black crappie (*P. nigromaculatus*).

The maintained/disturbed community consists of three habitats that have recently been or are currently impacted by human disturbance: roadside shoulder, maintained yard, and cropland.

Herbaceous vegetation found in the roadside shoulder include fescue (*Festuca* sp.), poison ivy (*Rhus radicans*), Virginia creeper (*Parthenocissus quinquefolia*), greenbrier (*Smilax* sp.), Japanese honeysuckle (*Lonicera japonica*), goldenrod (*Solidago* sp.), wingstem (*Actinomeris alternifolia*), common plantain (*Plantago* sp.), wood sorrel (*Oxalis* sp.), milkweed (*Asclepias* sp.), wild onion (*Allium canadense*), trumpet creeper (*Campsis radicans*), red clover (*Trifolium pratense*), ebony spleenwort (*Asplenium platyneuron*), ironweed (*Vernonia* sp.), vetch (*Vicia* sp.), ragweed (*Ambrosia* sp.), thistle (*Carduus* sp.), Carolina geranium (*Geranium carolinianum*), daisy fleabane (*Erigeron* sp.), Venus' looking glass (*Specularia perfoliata*), Queen Anne's lace (*Daucus carota*), ox-eye daisy (*Chrysanthemum leucanthemum*), running cedar (*Lycopodium flabelliforme*), five-fingers (*Potentilla canadensis*), ivy (*Hedera helix*), bellwort (*Uvularia* sp.), woolly mullein (*Verbascum thapsus*), wisteria (*Wisteria* sp.), and Joe-pye weed (*Eupatorium fistulosum*). One shrub species, blackberry (*Rubus* sp.), was observed in the roadside shoulder.

Herbs, grasses, and vines located in the maintained yard include fescue, white clover (*Trifolium repens*), hosta (*Hosta fortunei*), dandelion (*Taraxacum* sp.), ragweed, bamboo (*Smilax laurifolia*), and Carolina geranium. Shrub and tree species observed here include Bradford pear (*Pyrus calleryana*), flowering dogwood (*Cornus florida*), red maple (*Acer rubrum*), bull bay (*Magnolia grandiflora*), white pine (*Pinus strobus*), pecan (*Carya illinoensis*), and sycamore (*Platanus occidentalis*).

Species located in cropland include wheat (*Triticum aestivum*) and corn (*Zea mays*).

The herbaceous and vine layer of the mixed hardwood forest was dominated by Christmas fern (*Polystichum acrostichoides*), mock strawberry (*Duchesnea indica*), violet (*Viola* sp.), giant cane (*Arundinaria gigantea*), aster (*Aster* sp.), Japanese grass

(*Microstegium vimineum*), bedstraw (*Galium* sp.), panic grass (*Panicum* sp.), and Virginia chain-fern (*Woodwardia virginica*). Shrub and tree species observed here include black cherry (*Prunus serotina*), red maple, tulip poplar (*Liriodendron tulipifera*), sassafras (*Sassafras albidum*), persimmon (*Diospyros virginiana*), white oak (*Quercus alba*), white pine, multiflora rose (*Rosa multiflora*), smooth sumac (*Rhus glabra*), red mulberry (*Morus rubra*), blackberry, mimosa (*Albizia julibrissin*), northern red oak (*Quercus rubra* var. *borealis*), tree of heaven (*Ailanthus altissima*), weeping cherry (*Prunus subhirtella*), winged sumac (*Rhus copallina*), privet (*Ligustrum* sp.), post oak (*Quercus stellata*), short-leaf pine (*Pinus echinata*), Virginia pine (*Pinus virginiana*), holly (*Ilex opaca*), eastern hemlock (*Tsuga canadensis*), bear-grass (*Yucca filamentosa*) and black gum (*Nyssa sylvatica*).

Herbs, grasses, and vines located in the riparian fringe include jewel-weed (*Impatiens capensis*), pokeweed (*Phytolacca americana*), Christmas fern, Japanese honeysuckle, Japanese grass, and kudzu (*Pueraria lobata*). Shrub and tree species observed here include tag alder (*Alnus serrulata*), sycamore, blackberry, black willow (*Salix nigra*), river birch (*Betula nigra*), black walnut (*Juglans nigra*), blackgum, yellow root (*Xanthorhiza simplicissima*), and box elder (*Acer negundo*).

Estimated Impacts to Terrestrial Communities

Construction of the subject project will have various impacts on the biotic resources described. Any construction related activities in or near these resources have the potential to impact biological functions. A total of 1.65 ha (4.07 ac) of mixed hardwood forest will be impacted by project construction. A total of 14.00 ha (34.58 ac) of roadside shoulder community will be impacted by project construction. However, this community will be replaced by an equivalent community through re-vegetation after project completion.

Habitat reduction resulting from road construction concentrates wildlife into smaller refuge areas, thus changing competition between species and causing increased starvation, predation and susceptibility to disease.

WETLANDS AND PERMITS

Surface waters and wetlands fall under the broad category of "Waters of the United States," as defined in 33 CFR Section 328.3. Wetlands, defined in 33 CFR 328.3 (b), are those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and under normal circumstances do support, a prevalence of vegetation typically adapted to life in saturated conditions. Any action that proposes to place fill into these areas falls under the jurisdiction of the U.S. Army Corps of Engineers (COE) under Section 404 of the Clean Water Act (33 U.S.C. 1344).

No jurisdictional wetlands are located within the project area, however, impacts to Lineberry Creek, Williams Creek, and 7 unnamed tributaries will occur if the box culverts are extended according to current plans.

Permits

A Nationwide Permit No. 14 (65 FR 12817, 12888; March 9, 2000) is likely to be applicable for all impacts to Waters of the United States resulting from the proposed project. This permit authorizes activities undertaken, assisted, authorized, regulated, funded, or financed in whole, or part, by another Federal agency or department where that agency or department has determined the pursuant to the council on environmental quality regulation for implementing the procedural provisions of the National Environmental Policy Act:

(1) that the activity, work, or discharge is categorically excluded from environmental documentation because it is included within a category of actions which neither individually nor cumulatively have a significant effect on the human environment, and;

(2) that the office of the Chief of Engineers has been furnished notice of the agency's or department's application for the categorical exclusion and concurs with that determination.

In addition, a North Carolina Division of Water Quality (DWQ) Section 401 Water Quality General Certification is also required. Section 401 of the Clean Water Act requires that the state issue or deny water certification for any federally permitted or licensed activity that may result in a discharge into waters of the United States. The issuance of a 401 permit from DWQ is a prerequisite to issuance of a Section 404 Permit.

PROTECTED SPECIES

Some populations of fauna and flora have been in, or are in, the process of decline either due to natural forces or their inability to coexist with human activities. Federal law (under provisions of the Endangered Species Act of 1973, as amended) requires that any action, likely to adversely affect a species classified as federally-protected, be subject to review by the Fish and Wildlife Service (FWS).

Plants and animals with federal classifications of Endangered (E), Threatened (T), Proposed Endangered (PE), and Proposed Threatened (PT) are protected under provisions of Section 7 and Section 9 of the Endangered Species Act of 1973, as amended. An endangered species is considered to be a species that is in danger of becoming extinct throughout all or a significant portion of its range. A threatened species is considered to be a species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

As of March 22, 2001, the FWS lists no federally-protected species for Yadkin County.

Ecosystem Enhancement PROGRAM

January 4, 2005

Mr. Gregory J. Thorpe, Ph.D.
Environmental Management Director
Project Development and Environmental Analysis Branch
North Carolina Department of Transportation
1548 Mail Service Center
Raleigh, NC 27699-1548

Dear Dr. Thorpe:

Subject: EEP Mitigation Acceptance Letter:

R-3415, NC 67 Widening, Yadkin County

The purpose of this letter is to notify you that the Ecosystem Enhancement Program (EEP) will provide stream mitigation for the subject project. Based on the information supplied by you in letters dated November 29, 2004 and December 13, 2004, the impacts are located in CU 03040101 of the Yadkin River Basin in the Central Piedmont (CP) Eco-Region, and are as follows:

Stream Impacts: 1,198 feet (923 feet cool and 275 feet warm)

This letter replaces the mitigation acceptance letter issued on December 8, 2004. As stated in your letters, the subject project is listed in Exhibit 2 of the Memorandum of Agreement among the North Carolina Department of Environment and Natural Resources, the North Carolina Department of Transportation, and the U. S. Army Corps of Engineers, Wilmington District dated July 22, 2003. The mitigation for the subject project will be provided in accordance with this agreement.

If you have any questions or need additional information, please contact Ms. Beth Harmon at 919-715-1929.

Sincerely,

James B. Stanfill for

William D. Gilmore, P.E.
EEP Director

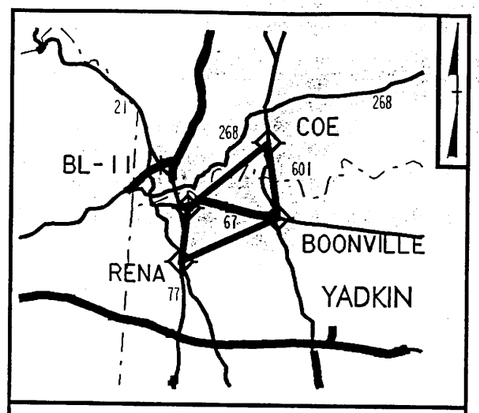
SURVEY CONTROL SHEET

PROJECT REFERENCE NO.	SHEET NO.
R-3415	1C
LOCATION AND SURVEYS	



VICINITY MAP

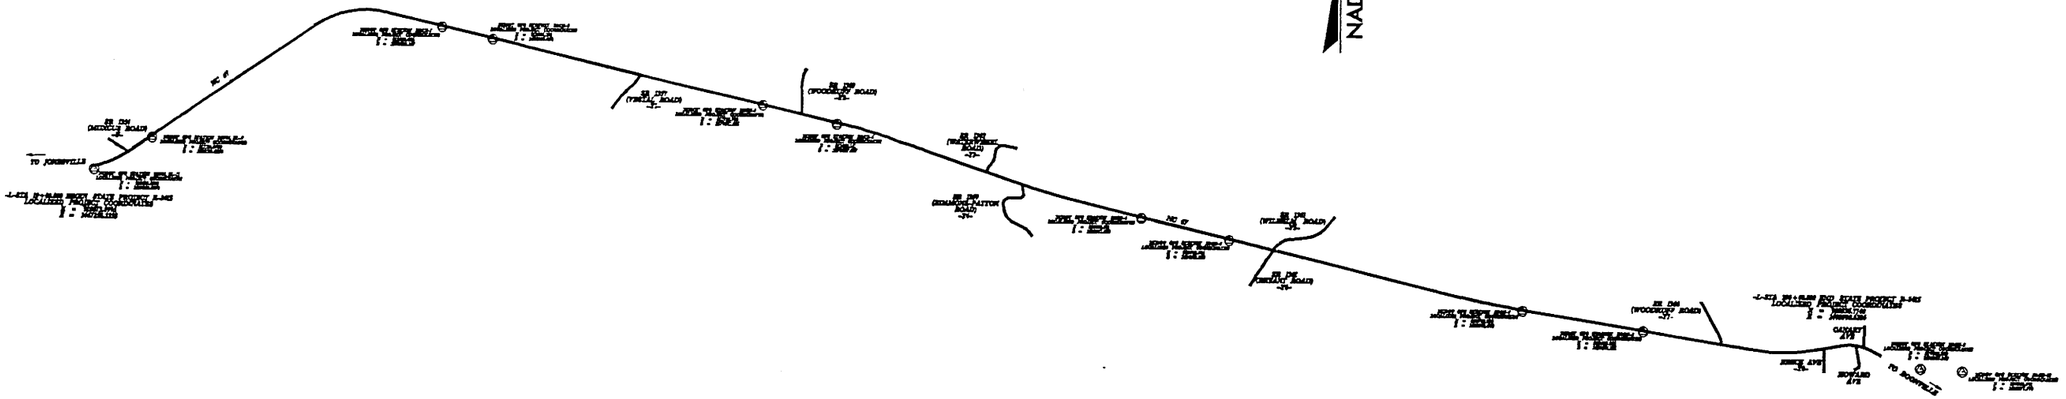
1. THE SITE CALIBRATION SHOWN IS BASED UPON A NETWORK TIED TO THE NAD 83 ADJUSTMENT. THIS CALIBRATION WILL ALLOW THE END USER TO WORK WITHIN THE SAME COORDINATE SYSTEM WHEN USING RTK (REAL TIME KINEMATIC) GPS AND A LOCAL BASE STATION. IF ANOTHER SYSTEM SUCH AS VRS (VIRTUAL REFERENCE STATION) IS USED. ADDITIONAL FIELD TIES MAY BE NEEDED TO REDUCE POSSIBLE ERRORS. OR BIASES.

2. THE CONTROL DATA FOR THIS PROJECT CAN BE FOUND ELECTRONICALLY BY SELECTING PROJECT CONTROL DATA AT HTTP://WWW.DOH.DOT.STATE.NC.US/PRECONSTRUCT/HIGHWAY/LOCATION/PROJECT/

THE FILES TO BE FOUND ARE AS FOLLOWS:

R3415_LS_GPSCALIB_030729.TXT
R3415_LS_WGS84_030729.TXT
R3415_LS_LOCAL_030729.TXT
R3415_LS_CONTROL_030XXX.TXT

THE WGS84 AND LOCAL FILES ARE COMMA DELIMITED AND CAN BE USED TO REPRODUCE THE SITE CALIBRATION FOR THE END USER'S GPS EQUIPMENT. IF FURTHER INFORMATION IS NEEDED. PLEASE CONTACT THE LOCATION AND SURVEYS UNIT.



DATUM DESCRIPTION

THE LOCALIZED COORDINATE SYSTEM DEVELOPED FOR THIS PROJECT IS BASED ON THE STATE PLANE COORDINATES ESTABLISHED BY NCDOT FOR MONUMENT "R-2704,BL7" WITH NAD 83 STATE PLANE GRID COORDINATES OF NORTHING: 911120.0750(m) EASTING: 1468183.6550(m) THE AVERAGE COMBINED GRID FACTOR USED ON THIS PROJECT (GROUND TO GRID) IS: 0.999958135 THE NC LAMBERT GRID BEARING AND LOCALIZED HORIZONTAL GROUND DISTANCE FROM "R-2704,BL7" TO -L- STATION 10+00.00 IS S 64°13'11" W 102.71' ALL LINEAR DIMENSIONS ARE LOCALIZED HORIZONTAL DISTANCES VERTICAL DATUM USED IS NGVD 29

◎ INDICATES GEODETIC CONTROL MONUMENTS USED OR SET FOR HORIZONTAL PROJECT CONTROL BY THE NCDOT LOCATION AND SURVEYS UNIT.

PROJECT CONTROL ESTABLISHED UTILIZING GLOBAL POSITIONING SYSTEM.

NETWORK ESTABLISHED FROM EXISTING NCGS AND NCDOT MONUMENTATION.

SEE GPS CALIBRATION SHEET FOR HORIZONTAL AND VERTICAL COORDINATE VALUES.

NOTE: DRAWING NOT TO SCALE

5/28/9

SURVEY CONTROL SHEET R-3415

GPS CALIBRATION REPORT

PROJECT : R3415

TIP NUMBER	R-3415		
USER NAME	RGMILLER	DATE & TIME	10:43:50 AM 7/29/2003
COORDINATE SYSTEM	US STATE PLANE 1983(AT GROUND)	ZONE	NORTH CAROLINA 3200
HORIZONTAL DATUM	NAD 1983 (CONUS)		
VERTICAL DATUM	NGVD29	GEOID MODEL	GEOID99 (CONUS)
COORDINATE UNITS	US SURVEY FEET		
DISTANCE UNITS	US SURVEY FEET		
HEIGHT UNITS	US SURVEY FEET		

LOCAL SITE INFORMATION

LOCALIZED AROUND	BL-7
LATITUDE	36°14'24.28999"N
LONGITUDE	80°48'12.89741"W
SITE SCALE FACTOR	1.0000186500

THE NORTH CAROLINA DEPARTMENT OF TRANSPORTATION USES A LOCALIZED COORDINATE SYSTEM WHICH IS VERY SIMILAR TO NORTH CAROLINA ZONE 3200 FROM WHICH IT IS DERIVED.
PLEASE TAKE CARE IN UTILIZING THESE COORDINATES TO ELIMINATE CONFUSION OF THE TWO SYSTEMS.
THIS FILE IS TO AID IN THE USE OF REAL TIME KINEMATIC (RTK) GPS DURING CONSTRUCTION LAYOUT.

DATUM DESCRIPTION

THE LOCALIZED COORDINATE SYSTEM DEVELOPED FOR THIS PROJECT IS BASED ON THE STATE PLANE COORDINATES ESTABLISHED BY NCDOT FOR MONUMENT "RZ704,BL-7" WITH NAD 83 STATE PLANE GRID COORDINATES OF NORTHING: 911120.075(ft) EASTING: 1468183.655(ft)
THE AVERAGE COMBINED GRID FACTOR USED ON THIS PROJECT (GROUND TO GRID) IS: .99998135
THE N.C. LAWBERT GRID BEARING AND LOCALIZED HORIZONTAL GROUND DISTANCE FROM "RZ704,BL-7" TO -L- STATION 10+00.00 IS
S 64°13'11" W 1027.71'
ALL LINEAR DIMENSIONS ARE LOCALIZED HORIZONTAL DISTANCES
VERTICAL DATUM USED IS NGVD 29

NOTES

1. THE SITE CALIBRATION SHOWN IS BASED UPON A NETWORK TIED TO THE NAD 83 ADJUSTMENT. THIS CALIBRATION WILL ALLOW THE END USER TO WORK WITHIN THE SAME COORDINATE SYSTEM WHEN USING RTK (REAL TIME KINEMATIC) GPS AND A LOCAL BASE STATION. IF ANOTHER SYSTEM SUCH AS VRS (VIRTUAL REFERENCE STATION) IS USED, ADDITIONAL FIELD TIES MAYBE NEEDED TO REDUCE POSSIBLE ERRORS, OR BIASES.

2. THE CONTROL DATA FOR THIS PROJECT CAN BE FOUND ELECTRONICALLY BY SELECTING PROJECT CONTROL DATA AT HTTP://WWW.DOH.DOT.STATE.NC.US/PRECONSTRUCT/HIGHWAY/LOCATION/PROJECT/

   THE FILES TO BE FOUND ARE AS FOLLOWS:

   R3415_LS_GPSCAL[B_030729.HTML
   R3415_LS_WGS84_030728.TXT
   R3415_LS_LOCAL_030728.TXT
   R3415_LS_CONTROL_030XXX.TXT

   THE WGS84 AND LOCAL FILES ARE COMMA DELIMITED AND CAN BE USED TO REPRODUCE THE SITE CALIBRATION FOR THE END USER'S GPS EQUIPMENT. IF FURTHER INFORMATION IS NEEDED, PLEASE CONTACT THE LOCATION AND SURVEYS UNIT.

DATUM DESCRIPTION

THE LOCALIZED COORDINATE SYSTEM DEVELOPED FOR THIS PROJECT IS BASED ON THE STATE PLANE COORDINATES ESTABLISHED BY NCDOT FOR MONUMENT "R2704,BL-7" WITH NAD 83 STATE PLANE GRID COORDINATES OF NORTHING: 911120.074(ft) EASTING: 1468183.655(ft)
THE AVERAGE COMBINED GRID FACTOR USED ON THIS PROJECT (GROUND TO GRID) IS: .99998135
THE N.C. LAMBERT GRID BEARING AND LOCALIZED HORIZONTAL GROUND DISTANCE FROM "R2704,BL-7" TO -L- STATION 10+00.00 IS S 64°13'11" W 1027.71'
ALL LINEAR DIMENSIONS ARE LOCALIZED HORIZONTAL DISTANCES
VERTICAL DATUM USED IS NGVD 29

NOTES

1. THE SITE CALIBRATION SHOWN IS BASED UPON A NETWORK TIED TO THE NAD 83 ADJUSTMENT. THIS CALIBRATION WILL ALLOW THE END USER TO WORK WITHIN THE SAME COORDINATE SYSTEM WHEN USING RTK (REAL TIME KINEMATIC) GPS AND A LOCAL BASE STATION. IF ANOTHER SYSTEM SUCH AS VRS (VIRTUAL REFERENCE STATION) IS USED, ADDITIONAL FIELD TIES MAYBE NEEDED TO REDUCE POSSIBLE ERRORS, OR BIASES.

2. THE CONTROL DATA FOR THIS PROJECT CAN BE FOUND ELECTRONICALLY BY SELECTING PROJECT CONTROL DATA AT HTTP://WWW.DOH.DOT.STATE.NC.US/PRECONSTRUCT/HIGHWAY/LOCATION/PROJECT/

   THE FILES TO BE FOUND ARE AS FOLLOWS:

   R3415_LS_GPSCALIB_030729.HTML
   R3415_LS_WGS84_030728.TXT
   R3415_LS_LOCAL_030728.TXT
   R3415_LS_CONTROL_0307XX.TXT

   THE WGS84 AND LOCAL FILES ARE COMMA DELIMITED AND CAN BE USED TO REPRODUCE THE SITE CALIBRATION FOR THE END USER'S GPS EQUIPMENT. IF FURTHER INFORMATION IS NEEDED, PLEASE CONTACT THE LOCATION AND SURVEYS UNIT.
