BEVERLY EAVES PERDUE
GOVERNOR

EUGENE A. CONTI, JR.
SECRETARY

May 21, 2010

Mr. Tom Walker
U.S. Army Corps of Engineers
Wilmington Field Office
P.O. Box 1890
Wilmington, NC 28402-1890

Subject: **Individual Section 404 Permit and Individual Water Quality Certification** for Fayetteville Outer Loop from I-95 South of Fayetteville to NC 24-87, Cumberland, Hoke, and Robeson Counties. Federal Aid Project No. NHF-DPR-0100(001), State Project No. 8.2441301, TIP Nos X-0002 B & C, and U-2519 AA, AB, BA, BB, CA, CB, DA, & E, Debit $570 from WBS 35196.3.19

Reference: Original Permit Application requested April 25, 2008
Section 404 Individual Permit issued October 23, 2008; USACE Permit No. SAW-2008-01413
Section 401 Water Quality Certification issued October 6, 2008; NCDWQ Project No. 003278

Dear Sir:

Please see the enclosed revised permit drawings, roadway plans, and a revised Privateer Wetland and Stream Mitigation Site Debit Ledger for the above referenced project. The wetland at site 10 (Sta. 13+66-14+06 -Y-) was inadvertently left off the original permit application. Compensatory Mitigation for the additional 0.24 acre of wetland impact has been debited from the Privateer Wetland and Stream Mitigation Site. In addition, the impact to the pond at site 3 (Sta. 105+15-105+70 -L-) increased from 0.72 acre to 0.73 acre and the impact to the pond at site 9 (Sta. 14+20 -Y-Rev) will be 2.54, which was unknown at the time of the original application.

Section 404 Permit: NCDOT requests that the U.S. Army Corps of Engineers (USACE) review this application and issue a modification for the Individual 404 Permit issued October 23, 2008, as required for the above-described activities.

Section 401 Permit: NCDOT requests that the NCDWQ review this application and issue a modification for the Individual 401 Certification issued October 6, 2008, as required for the above-described activities. In accordance with 15A NCAC 2H .0501(a) we are providing five copies of this modification request to the North Carolina Department of Environmental and Natural Resources for their approval and $570 to act as payment for processing the permit modification (see subject line).

Compensatory Mitigation

The Privateer Farms Restoration Site (Site) is located in Bladen and Cumberland Counties, North Carolina, approximately fourteen miles southeast of Fayetteville. Prior to restoration, land use on the Site over the past 20 years had been primarily row crop agriculture. Stream and riparian functions on the Site had been severely impacted as a result of agricultural conversion. Harrison Creek had historically meandered through the Site, but was channelized in the early 1980s to reduce flooding and provide a drainage outlet for the extensive network of ditches excavated across the Site. Subsequent to channelization, Harrison Creek existed as a large canal running straight through the Site.

Restoration activities for the Site involved moving the stream channel back to its historic location and elevation, and filling drainage ditches to raise the local water table and restore wetland and stream hydrology. The plan also included scarification of the fields and breaking of the local plow pan to increase surface water storage and provide a range of hydrologic conditions suitable for a variety of native wetland plant species. The restoration plan for the Site predicted the restoration of 405 acres of riverine wetlands, 25 acres of riverine wetland enhancement, and 33,985 linear feet (LF) of stream restoration. Following construction, the as-built data indicated that the total area of restored riverine wetlands was 402.5 acres (excluding 2.5 acres for road accesses), with 25 acres of enhanced riverine wetlands, and 34,005 LF of restored stream channel.
As of fall 2009, the Site has met all prescribed hydrologic and vegetative monitoring criteria and been recommended for closeout.

To offset an additional 0.24 acres unavoidable riverine wetland impacts associated with T.I.P. R-2519, the Privateer Farms Mitigation Site will be debited 0.36 acres of riverine wetland restoration. This debit is reflected in the following ledger.

Site Name	River Basin	HUC	Mitigation Type	Transfer from EEP	Available	TIP Debit	TIP Debit
Privateer Site	Cape Fear	3030004				**U-2519**	**U-2519 MOD**
			Warm Stream Restoration	25,676	7,157	18,519	
			Riverine Wetland Restoration	145.98	0.33	145.29	0.36
