**Subject: Request for Modification for Section 404 Individual Permit and Section 401 Water Quality Certification** for the I-40/I-77 interchange improvements including I-40 from west of SR 2003 (Radio Road) to SR 2158 (Old Mocksville Road) and I-77 from south of SR 2321 (East Broad Street) to south SR 2171 (Jane Sowers Road) in Iredell County. Division 12, TIP I-3819B. Debit \$570.00 from WBS 34192.3.2

**Reference:** 1) Section 404 Individual Permit, Action ID No. SAW-2018-01504, issued January 21, 2020, modified February 25, 2021 and December 14, 2021; 2) Section 401 General Water Quality Certification No. WQC004203, NCDWR Project No. 20191006, issued November 19, 2019 and revised January 30, 2020, and modified February 12, 2021 and December 9, 2021.

Dear Sir and Madam:

The purpose of this letter is to request modification of the United States Army Corps of Engineers (USACE) Section 404 Individual Permit and associated North Carolina Division of Water Resources (NCDWR) Section 401 Water Quality Certification for the above referenced project.

Revisions resulting in changes to permitted impacts are proposed at two impact sites (Sites 22 and 23). Two new impact sites (Sites 22A and 22B) have been added within the footprint of the previously permitted Site 22. The changes to these sites are described below.

Previously permitted stream impacts included 3,305 linear feet of permanent stream impacts (which includes 1,139 linear feet of stream bank stabilization) and 482 linear feet (0.10 acre) of temporary stream impacts. All permitted stream impacts were related to roadway construction; there were no stream impacts related to utilities.

*Mailing Address:*  
NC DEPARTMENT OF TRANSPORTATION  
ENVIRONMENTAL ANALYSIS UNIT  
1598 MAIL SERVICE CENTER  
RALEIGH NC 27699-1598

*Telephone:* (919) 707-6000  
*Fax:* (919) 250-4224  
*Customer Service:* 1-877-368-4968  
*Website:* www.ncdot.gov

*Location:*  
1000 BIRCH RIDGE DRIVE  
RALEIGH NC 27610

The total permanent wetland impacts previously permitted for roadway construction were 1.40 acres (including 1.07 acres for wetland fill and 0.33 acre for mechanized clearing). The total permanent wetland impacts previously permitted for utilities was 0.16 acre (including <0.01 acre for wetland fill and 0.16 acre for mechanized clearing). The previously permitted temporary wetland impacts for roadway construction was 2.64 acres. The previously permitted temporary wetland impacts for utilities was 0.27 acre. Hand clearing of <0.01 acre for utilities was also previously permitted.

The revised stream impacts for the project total 2,527 linear feet of permanent stream impacts (which includes 361 linear feet of stream bank stabilization impacts) and 469 linear feet (0.10 acre) of temporary stream impacts. All stream impacts are related to roadway construction; there are no stream impacts resulting from utilities. There are no changes to wetland impacts for roadway construction or utilities.

This modification will result in the reduction of 778 linear feet of permanent stream channel impacts, including a reduction of 778 linear feet of stream bank stabilization impacts. There is also a reduction of 13 linear feet of temporary stream channel impacts. Please see the enclosed revised permit drawings and roadway sheet. A summary of the changes is shown in Table 1 below. A narrative describing the revisions made to each permit impact site are presented below.

**Table 1 – Summary of changes to impacts\***

<b>Impact Type</b>	<b>Previously Permitted Impacts</b>	<b>Proposed Permit Modification</b>	<b>Difference</b>
<b>Roadway Impacts</b>			
Permanent Stream Impacts	3,305	2527	-778
<i>Bank Stabilization Impacts</i>	<i>1,139</i>	<i>361</i>	<i>-778</i>
Temporary Stream Impacts	482	469	-13
Permanent Wetland Fill	1.07	1.07	0
Mechanized Clearing in Wetlands	0.33	0.33	0
Hand Clearing in Wetlands	0	0	0
Temporary Wetland Fill	2.64	2.64	0
<b>Utility Impacts</b>			
Permanent Wetland Fill	< 0.01	< 0.01	0
Mechanized Clearing in Wetlands	0.16	0.16	0
Hand Clearing in Wetlands	< 0.01	< 0.01	0
Temporary Wetland Fill	0.27	0.27	0

\*Stream impacts are in linear feet. Wetland impacts are in acres.

**Permit Impact Site Modifications (shown in revised permit drawings):**

**Site 22**

The previously permitted design at Site 22 included 901 linear feet of permanent stream impact from bank stabilization (Class II riprap) along stream ST, 185 linear feet of permanent stream bed stabilization impacts, 45 linear feet of 9' x 11' reinforced concrete box culvert (RCBC) extension, and 225 linear feet of permanent new channel stream (i.e., channel change) impacts. Per guidance from NCDWR, the 901 linear feet of proposed rip rap stream bank stabilization along ST has been eliminated from Site 22; instead the project now includes stabilization of the banks with black willow (*Salix nigra*) live stakes. Live stakes were installed in spot locations along the stream banks and no grading of the stream banks was conducted, therefore this activity is not a Section 404-regulated activity. Live staking was also installed beyond the jurisdictional limits of the stream between the top of bank and the retaining wall in this area. All other impacts at Site 22 remain unchanged. Sites 22A and 22B, discussed below, include minor riprap stream

bank stabilization within the previously permitted Site 22.

Note that the 225 linear feet of new channel (i.e., channel change) impacts originally approved at Sta. 72+89 – 75+10-Y were inadvertently mislabeled as stream bank stabilization in the Wetland and Stream Impact Summary Table in the October 20, 2021 permit modification #2 submittal. Although incorrectly labeled, the overall amount of permanent stream impacts and stream bank stabilization impacts for the entire project were correctly calculated and reported. The attached Wetland and Stream Impact Summary Table has corrected the impact type for this location.

Site 22A

Site 22A is situated within the former stream bank stabilization portion of Site 22. At Site 22A, 20 linear feet of stream bank stabilization may be required at Stream ST to allow the contractor to stabilize the slope, if needed, following possible removal of an existing 15-inch reinforced concrete pipe (RCP).

Site 22B

Site 22B is situated within the former stream bank stabilization portion of Site 22. At Site 22B, 25 linear feet of stream bed stabilization and 25 linear feet of stream bank stabilization will be required at Stream ST, associated with the extension of a 48-inch RCP.

Site 23

The previously permitted design at Site 23 included 33 linear feet of temporary stream impact in stream ST to accommodate construction of the retaining wall along I-77. Per guidance provided in the field by NCDWR, the design at this site has been revised to include 78 linear feet of permanent stream impacts from stream bank stabilization and 20 linear feet (<0.01 acre) of temporary stream impacts.

Please see the enclosed revised permit drawings and roadway plans where revisions resulted in design and/or impact changes to permitted impact sites. Note that additional Sites 22A and 22B are included in the revised roadway permit drawings. A summary of the revised stream impact sites is shown in Table 2 below.

**Table 2: Changes at Sites 22, 22A, 22B, and 23**

Permit Site	Stream Name/ NRTR ID	Status/ Class	Permanent		Temporary Channel Impacts ac (lf)	USACE Required Mitigation lf	NCDWR Required Mitigation lf
			Channel Impacts lf (ac)	Bank Stabilization lf (ac)			
22	UT to Fourth Creek ST	Perennial C	430 (0.18) 455 (0.18)	0 (0.0) 901 (0.34)	--	--	--
22A	UT to Fourth Creek ST	Perennial C	--	20 (<0.01)	--	--	--
22B	UT to Fourth Creek ST	Perennial C	25 (<0.01)	25 (<0.01)	--	25	25
23	UT to Fourth Creek ST	Perennial C	--	78 (0.03)	(<0.01) 20 (<0.01) (33)	--	--

**Revised Compensatory Mitigation**

The North Carolina Division of Mitigation Services (NCDMS) previously provided compensatory mitigation for 2,166 linear of permanent stream impacts and 1.56 acre of permanent riparian wetland impacts.

Of the revised permanent stream impacts totaling 2,527 linear feet for this modification, 361 linear feet are the result of bank stabilization and are not considered loss of waters and therefore do not require mitigation from USACE or NCDWR. After the revisions, permanent stream impacts that require mitigation from USACE for this project have not changed from the previous DMS mitigation acceptance. Permanent wetland impacts that require mitigation from USACE for this project have also not changed from the previous DMS mitigation acceptance.

No changes have occurred to special commitments for this project.

NCDOT requests to modify the permit for this project. Application is hereby made for modification of the USACE 404 permit and the 401 WQC from NCDWR. We have provided a method of debiting \$570.00 to be submitted to the NCDWR for processing the WQC modification for I-3819B, as noted in the subject line of this application.

A copy of this permit application and its distribution list will be posted in the NCDOT website at <http://connect.ncdot.gov/resources/Environmental>. Thank you for your assistance with this project. If you have any questions or need additional information, please contact Erin Cheely at either [ekcheely@ncdot.gov](mailto:ekcheely@ncdot.gov) or (919) 323-5192.

Sincerely,

Michael A. Turchy  
Environmental Coordination and Permitting Group Leader
