4h. Explain the purpose of the proposed project: *

Installation of conduit containing broadband fiber will be coupled with microcell towers and Intelligent Transportation Systems (ITS) equipment to provide variable message signs along US 70 (future I-42) and to implement integrated corridor management.

Additionally, installation of conduit maximizes the innovative contracting opportunities that can arise from allowing private sector to have access to the trunk line. Implementation will provide high speed internet access to underserved communities closing the internet service gap between urban and rural households in eastern North Carolina.

4i. Describe the overall project in detail, including indirect impacts and the type of equipment to be used: *

The North Carolina Department of Transportation (NCDOT) proposes to install broadband fiber along the US 70 (future I-42) from I-40 east to Morehead City Port. The conduit used for the project will be installed entirely within the existing NCDOT right of way. Anticipated equipment to be used includes dump trucks, plows, dozers, trenchers, backhoes, and boring equipment.

E. Impact Justification and Mitigation

1. Avoidance and Minimization

1a. Specifically describe measures taken to avoid or minimize the proposed impacts in designing the project:*

All work will occur within the existing NCDOT right of way. There will be no impacts to jurisdictional streams. When streams are encountered along corridor, conduit will either be attached to the existing structure or directionally bored under the stream. All wetlands with a length of 50 feet or greater will be directionally bored, resulting in no impact.

1b. Specifically describe measures taken to avoid or minimize the proposed impacts through construction techniques:*

Where applicable, NCDOT "Design Standards in Sensitive Watersheds" will be adhered to. Once installed, the fiber optic lines will not require maintenance and will be allowed to revert to the previously undisturbed state.

2. Compensatory Mitigation for Impacts to Waters of the U.S. or Waters of the State

2a. Does the project require Compensatory Mitigation for impacts to Waters of the U.S. or Waters of the State?

Yes No

2b. If this project DOES NOT require Compensatory Mitigation, explain why:

All impacts to jurisdictional wetlands are considered temporary and do not require mitigation.

NC Stream Temperature Classification Maps can be found under the Mitigation Concepts tab on the Wilmington District's RIBITS website.

F. Stormwater Management and Diffuse Flow Plan (required by DWR)

*** Recent changes to the stormwater rules have required updates to this section. ***

1. Diffuse Flow Plan

1a. Does the project include or is it adjacent to protected riparian buffers identified within one of the NC Riparian Buffer Protection Rules?

Yes No

1b. All buffer impacts and high ground impacts require diffuse flow or other form of stormwater treatment. If the project is subject to a state implemented riparian buffer protection program, include a plan that fully documents how diffuse flow will be maintained.

All Stormwater Control Measures (SCM)s must be designed in accordance with the NC Stormwater Design Manual. Associated supplement forms and other documentation shall be provided.

What type of SCM are you providing?

- Level Spreader
- Vegetated Conveyance (lower SHWT)
- Wetland Swale (higher SHWT)
- Other SCM that removes minimum 30% nitrogen
- Proposed project will not create concentrated stormwater flow through the buffer
(check all that apply)

June 25, 2020

Philip S. Harris III, P.E.
NC Department of Transportation
Environmental Analysis Unit
1598 Mail Service Center
Raleigh, North Carolina 27699-1598

Dear Mr. Harris:

This letter is in response to your letter of June 23, 2020 which provided the U.S. Fish and Wildlife Service (Service) with the biological conclusion of the North Carolina Department of Transportation (NCDOT) that the proposed installation of broadband fiber optic cable along US 70 (future I-42) from I-40 east to Morehead City Port and along I-95 from the South Carolina State line to the Virginia State line (STIP Nos. R-5777D and I-5986C) may affect, but is not likely to adversely affect the federally endangered Cape Fear Shiner (*Notropis mekistocholas*), Dwarf Wedgemussel (*Alasmidonta heterodon*), and Tar River Spinemussel (*Parvaspina steinstansana*), as well as the federally threatened Yellow Lance (*Elliptio lanceolata*). In addition, NCDOT has determined that the action may affect, but is not likely to adversely affect the proposed endangered Carolina Madtom (*Noturus furiosus*) and the proposed threatened Atlantic Pigtoe (*Fusconaia masoni*) and Neuse River Waterdog (*Necturus lewisi*). The federally threatened northern long-eared bat (*Myotis septentrionalis*) has previously been addressed through a programmatic biological opinion. NCDOT has determined that the action will have no effect on all other listed species. The following response is provided in accordance with Section 7 of the Endangered Species Act (ESA) of 1973, as amended (16 U.S.C. 1531-1543).

According to information provided, the fiber optic cables will be installed within existing NCDOT right-of-way and will utilize minimally invasive installation techniques. At all stream crossings, the fiber optic cables will either be directionally bored underneath the stream or will be installed over the stream on existing bridges. Based on available information, and given the minimal amount of ground disturbance, the Service concurs with your conclusion that the proposed action may affect, but is not likely to adversely affect the Cape Fear Shiner, Dwarf Wedgemussel, Tar River Spinemussel, Yellow Lance, Carolina Madtom, Atlantic Pigtoe, and Neuse River Waterdog. Although the Carolina Madtom, Atlantic Pigtoe, and Neuse River Waterdog are currently only proposed listed species, this concurrence will be valid if and when the species are listed. Based on available information, the Service also concurs with your conclusion that the action will have no effect on all other listed species. We believe that the requirements of Section 7(a)(2) of the ESA have been satisfied. We remind you that obligations under Section 7 consultation must be reconsidered if: (1) new information reveals impacts of this identified action that may affect listed species or critical habitat in a manner not previously

considered in this review; (2) this action is subsequently modified in a manner that was not considered in this review; or (3) a new species is listed or critical habitat determined that may be affected by this identified action.

The Service appreciates the opportunity to review this project. If you have any questions regarding our response, please contact Mr. Gary Jordan at (919) 856-4520 (Ext. 32).

Sincerely,

A handwritten signature in cursive script that reads "Gary Jordan for".
